

COME DIG WITH US IN 2009

Crocodile fossil dig in the scenic and rugged North Dakota badlands near Buffalo Gap

A sixty million-year-old fossil site containing crocodile, champsosaur (crocodile-like animal), turtle, and fish have recently been discovered in the beautiful and rugged badlands near Buffalo Gap, North Dakota. The North Dakota Geological Survey and the Marmarth Research Foundation, in cooperation with the U.S. Forest Service - Dakota Prairie Grasslands, will participate in scientific, professionally-conducted, fossil excavations at this site in August 2009. Public participation is invited.

Crocodile

Who: Open to anyone 14 years or older
